

Beginning in March 2022 the MBTA, as part of the Worcester Station upgrades, will be moving its passengers to a temporary platform east of the station to facilitate project construction. Signage will direct riders from the parking garage through the station, leading through the Rotunda, to the Temporary Platform. Customers will also be able to access the Temporary Platform from the Commuter Rail parking lot.

The Commuter Rail parking lot will remain open during construction, some spots will be unavailable during different phases of the project. Accessible spaces remain available and there is a designated drop off near the ramp to access the Temporary Platform.

Passengers should allow for some additional time to access the new Temporary Platform.

The MBTA Worcester Union Station Improvements Project Team recently recorded a project update where the details of this work were presented.

To view the PowerPoint presentation or to watch the video recording of the update, please visit the project webpage, under "Recorded Project Overview".
