Lynn Station Improvement Project

Recorded Project Overview

April 2022

Sharon Cranston, MBTA Sr. Project Manager

Agenda

- A. Program Overview
- B. Existing Conditions
- C. Proposed Improvements
- D. Project Next Steps
- E. Public Outreach

Lynn Station Improvements Overview

Overview:

- Reconstruction and modernization of Lynn Station addressing structural repairs and accessibility upgrades. Project features include a new high-level center island platform, stairs, elevators, canopies, and signage
- Design contract awarded to Thornton Tomasetti in 2021 for \$3.1 million
- **Status:** 30% Design Complete, progressing to 75%

Objectives:

- Improve station accessibility with two ADA compliant elevators to access both ends of the platform, as well as improve pedestrian circulation and wayfinding
- Improve safety, reliability, and customer experience

Existing Conditions

Proposed Improvements

- Replace two existing elevators with ADA compliant elevators
- Replace and upgrade existing stairs
- New center island platform and canopy
- Upgrades to safety systems and electrical utilities
- Improve station lighting and signage

Overall Existing View - Lynn Station

Next Steps

- **Progress in Project Design**
Anticipate reaching 75% design in Spring 2022
- **Identify Construction Funding**
- **Neighborhood Outreach and Surveys**

Lynn Commuter Rail Station

A rendering of the Lynn Commuter Rail station platform after improvements (March 2022)

Building a Better T

As part of our \$8 billion, 5-year capital investment plan, we're renovating stations, modernizing fare collection systems, upgrading services for our buses, subways, and ferries, and improving the accessibility of the entire system.

The Lynn Commuter Rail station on the Newburyport/Rockport Line is a key transportation hub for the City of Lynn and the MBTA bus system. We are planning significant improvements to the station's structure, safety, functionality, and accessibility that will also reduce station maintenance costs.

★ **Projected completion:** 2024
★ **Status:** 30% design

Project Features

We will make structural repairs and upgrades to various components, including the following:

- New platform surfaces and other platform upgrades
- Accessibility upgrades, including new stretcher-compliant elevators at both ends of the platform
- New canopies over platforms
- Track improvements
- New stairs

Rider Benefits

- Full accessibility
- Improved functionality
- Improved pedestrian circulation and wayfinding
- Enhanced station and system safety features
